## Voortgangsrapportage

**Commissienummer** CEN/TC228

**1<sup>e</sup> aanspreekpunt NL:** Jaap Hogeling

**Titel commissie** Heating systems and water based cooling systems for buildings

**Voortgang:** ongoing work on amendment or revision of parts of the EN 15316-4 series , the EPB standards on different heat generation systems. This means preparing for amendments on EN 15316 part -4-1, -4-4, -4-5, -4-8, and -5, due to corona there is a delay.

For EN 15316-4-2 Energy performance of buildings — Method for calculation of system energy requirements and system efficiencies — Part 4-2: Space heating generation systems, heat pump systems, Module M3-8-2, M8-8-2 the Task Group of WG4 realised after 13+ meetings since December 2020 a new prEN which is expected to be published for enquiry the coming months. At enquiry stage it will be explained that some of the options included in this prEN are not final art, the TG expects technical comments on the fact that more options are presented. The TG expect that it will be possible based on the feedback to make the right choices to make the standard more normative (unambiguous ). This is expected to require a 2<sup>nd</sup> enquiry.

**Vragen voor de NsC 35107426:**

geen

**Datum volgende vergadering:**

1-2 September 2021
